### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-25, drawn to mobile station determines its own location, classified in class 455, and subclass 456.1.
  - II. Claims 26-28, drawn to base station determines location for mobile station, classified in class 455, subclass 456.1.
  - III. Claims 29-32, drawn to base station circuitry having signal generator unit, timing change unit, and transmitter unit, classified in class 455, subclass 561.
  - IV. Claims 33-35, drawn to a server to which base stations are connected to, classified in class 455, subclass 412.1.
  - V. Claims 36-37, drawn to mobile circuitry having receive unit, memory unit, measurement unit, and calculator unit, classified in class 455, subclass 550.1.
  - VI. Claims 38-41, drawn to method for supplying signal pattern, classified in class 455, subclass 456.1.
2. Inventions I, II, III, IV, V, and VI are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as mobile station determines its own location, invention II has separate utility such as base station determines location for mobile station, invention III has separate utility such as base station can be used in other mobile communications, not necessarily the system in the present application,

invention IV has separate utility such as server can be used in other mobile communications, not necessarily the system in the present application, invention V has separate utility such as mobile station can be used in other mobile communications, not necessarily the system in the present application, and invention VI has separate utility such as method for supplying signal pattern. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alemayehu Behulu whose telephone number is 703-305-4828. The examiner can normally be reached on 8 AM - 5PM.
